Comment faire une procédure :

Présentation:

Objet de la procédure : Installation GLPI

Logiciel: GLPI

Version du logiciel:

Date de la procédure: 13/09/2017

Nom du rédacteur : Stefan Speter

1- Allez dans file et cliquez sur open

6-

- 8- Cliquez sur votre session
- 9- Fermez le gestionnaire de serveur grâce à la croix.

10 – Accéder au dossier en copiant ceci dans la barre de recherche :

C:\necessaire pour glpi

- 13- Faites la même opération pour visual studio 2013 et 2017 se situant toujours dans le dossier 'nécessaire pour GLPI'
- 14- Installation de wampserver

25 – Tester Wampserver. Aller sur le bureau et faites un double clic droit sur l'icône.

27 – Vérifier que l'icône est verte en cliquant sur la flèche en bas à droite.

28- Installation de winrar, pour cela retournez dans le dossier necessaire pour GLPI (ici : C:\necessaire pour glpi\winrar)

5^{ème} étape : Installation GLPI

32- Retourner dans le disque C/necessairepourglpi/glpiversion9

37- Retournez sur le bureau.

44- Tous les tests doivent être au vert sauf APCu (normal)

46- Laissez cette fenêtre ouverte.

6ème étape : Création de la base de données dans PhpMyAdmin.

47- Refaite un clic gauche sur l'icône de wampserver et cliquez sur phpMyAdmin.

50- Si Internet Explorer vous affiche ce message cliquez sur ajouter et encore ajouter.

51- Dans Création d'une base de données rentrez 'glpibd' et cliquez sur créer.

52- Cliquez sur plus, privilèges.

54- mdp: nom de famille

7^{ème} étape : Fin de l'installation de glpi.

52- Revenir sur la fenêtre et remplissez la avec vos identifiants choisis dans SQL et cliquez sur continuer.

53- Cliquez sur glpibd puis continuer.

58- Pour quitter glpi cliquez sur l'icône en haut à droite

Etape 8 : raccourci glpi

59- Faites un clique droit sur le bureau -> nouveau -> raccourci.

60- Ecrivez l'url ci-dessous puis cliquez sur Suivant.

61- Rentrez glpi pour son nom.

62- Un icône doit apparaître sur le bureau.
